

EVERYTHING YOU NEED TO KNOW.

PRESS RELEASE

x.news™ is on a mission to simplify the sharing of journalists' research

Pinkafeld, Austria 4/19/2016

x.news information technology today announced their integration with Microsoft OneNote, allowing journalists' research to be published to Office 365 and easily shared. x.news™ is a cutting-edge story research tool for the modern newsroom, running on the Microsoft Azure platform. With x.news™,

journalists can search selected sources, collect all relevant information, write their scripts, share their stories and follow others - all in one place. OneNote, the digital notebook from Microsoft, is a popular tool for journalists to capture their thoughts, discoveries and ideas.

EVERYTHING YOU NEED TO KNOW.

It is the goal of x.news™ to simplify the journalist's workflow and improve collaboration. Through the new integration with Office 365 OneNote:

- Journalists can research a story in x.news™ and then publish all their research directly into OneNote.
- This includes text and images they have collected – agency copy, tweets, web content or content from internal systems.
- It also includes any notes or scripts they have written in x.news™.
- The research in OneNote is readily accessible for colleagues to share, including non-x.news™ users.
- Journalists can update the content in OneNote from x.news™ as often as they need to.

Besides running on the Microsoft Azure platform and the new integration with OneNote, x.news™ will soon support Active Directory (Azure AD), enabling users a Single Sign-On (SSO), so that journalists can access their systems without using different usernames or passwords.

Experience x.news™ at NAB Las Vegas. Please come by the Microsoft booth #SL6810

ABOUT X.NEWS

x.news information technology gmbh is the company behind the award-winning on-demand solution for the modern newsroom, running on the Microsoft Azure platform. It is a powerful story research tool that transforms the way journalists work by monitoring the different sources (news agencies, social media sites, web and internal sources) all in one screen. With x.news™, journalists can find, follow, collect and share all the latest information to deliver better and faster journalism.

x.news™ will continue to innovate with cutting-edge solutions for the modern newsroom. For more information about x.news™, please visit the company website www.x-news.eu and request a demo version.
